PRACTICE

DESIGN

UX research · Wireframing ·
Prototyping · Design systems · Brand
and print

BUILD

HTML · CSS · JavaScript · Python ·
Static and serverless web

AI SYSTEMS

Context engineering · Workflow
automation · Local model tooling

ACCESSIBILITY

WCAG 2.2 A/AA, measured · Inclusive
IA · Low-literacy interfaces

TOOLS

- Figma
- Adobe Creative Suite
- Git and GitHub
- Cloudflare Workers
- Playwright

01 / PROFILE

I design and build the systems small organizations actually own. Twenty years of visual craft, a UX research practice on top of it, and enough engineering to ship the thing myself. Research first, **accessibility** measured rather than assumed, and a finished product the client keeps.

02 / EXPERIENCE

LUXIGA LLC

FOUNDER & DESIGN TECHNOLOGIST

Portland, Oregon · 2026 to Present

- Design and ship websites, custom tools and workflow systems clients own outright, with no subscription and no vendor lock-in.
- Run the whole engagement, from research and IA through visual design, build, accessibility testing and handoff.
- Built and maintain a multi-project delivery stack with automated CI, browser tests and pre-ship safety review.

FREELANCE DESIGN

UX & VISUAL DESIGNER

Portland, Oregon · 2020 to 2026

- Marketing and brand design across print and digital, from logos through full asset sets.
- UI design for desktop and mobile applications, wireframe through prototype.
- Prepared every job to press or platform specification and delivered the working files.

03 / SELECTED WORK

BUILT AND SHIPPED

FieldKit · Golden Goose Construction · luxiga.co ·
BRIGS

FieldKit *white-label field data capture*

One capture engine configured for eight different trades, so a small operator gets a tool built for their vocabulary instead of a generic form.

EDUCATION

Portland State University

B.A. Graphic Design
Senior capstone, Fall 2026

Chemeketa Community College

A.S. Business, 2013
A.A. Oregon Transfer, 2010

KickassUX

UI/UX Expert, February 2022

METHOD

- Heuristic evaluation
- User interviews
- Story mapping
- Competitive analysis
- Usability testing
- IA redesign

ALSO

DOMAIN

Construction trades · Nonprofit
operations · Small business software

03 / SELECTED WORK, CONTINUED

Golden Goose Construction *live client site*

Roofing and renovation contractor in Salem, Oregon. Design, build, deploy, browser tests and an admin portal behind access control. Live at goldgosling.com.

BRIGS *context intelligence*

A memory layer for AI tooling, so a solo operator says a thing once instead of re-explaining themselves at the start of every session.

luxiga.co *studio site and identity*

Brand system, logo and site. The wordmark is Space Grotesk with the X rebuilt as two crossing blades, design and technology, so the icon is the word.

04 / FOUNDATION

Design practice since 2006 *print to product*

Taught myself Photoshop, Illustrator and InDesign by trial and error, and picked up HTML, CSS and JavaScript the same year. Every layer since, UX research, design systems and full-stack build, has been added to that foundation rather than replacing it.

Accessibility as a precondition *not a feature*

Every build is measured against WCAG 2.2 A/AA in a real browser rather than asserted, and designed for the user with limited tech literacy or no budget for a software stack.

Ownership over subscription *the LUXIGA thesis*

One-time deployments instead of recurring products. The systems keep running after the engagement ends, and the client keeps the keys.

05 / CREDENTIALS

Two associate degrees *Chemeketa, 2010
and 2013*

KickassUX bootcamp graduate *2022*

LUXIGA LLC, active with Oregon SoS *2026*

Senior capstone at Portland State *Fall 2026*
